Global Security - Making Your Supply Chain Safer?

Beth Peterson, President, BPE

C-TPAT Systems for Achieving Tier 3 Status

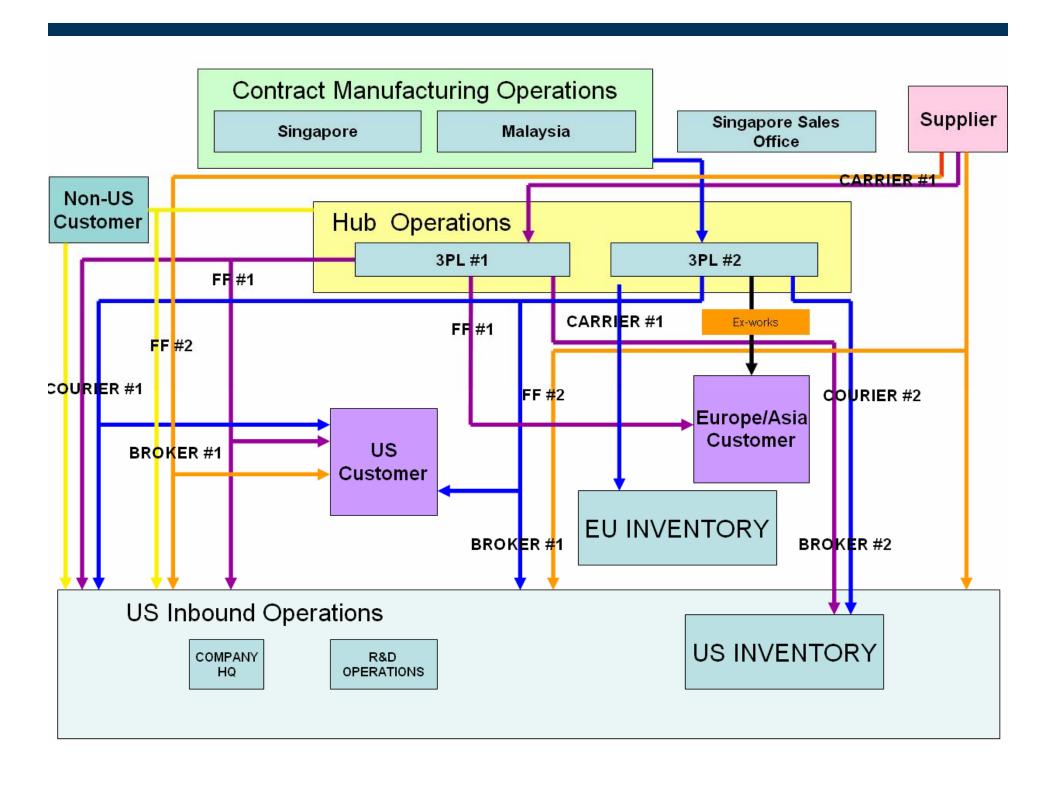

- Senior management support.
- Multi-departmental team.
- Exceed the minimum security criteria.

Developing a Global Supply Chain Risk Analysis

- Diagram your supply chain.
- Profile your suppliers.
- Establish risk levels.

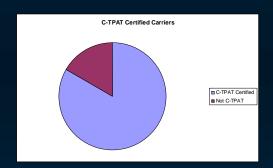

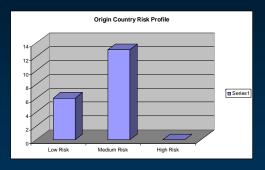

Supplier Profiling

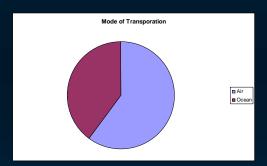

- Analyze by supply chain risk, not by business risk.
 - Origin.
 - Mode.
 - Carrier.
 - Supplier.

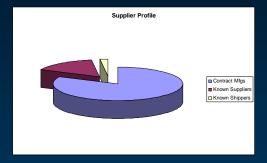

Identify Risk Levels

But What if I Have 3000 Suppliers?

- Prioritize by supply chain risk.
- Use tools:
 - Self-assessment.
 - Automated risk analysis.

Effective Methods for Developing a Security Profile

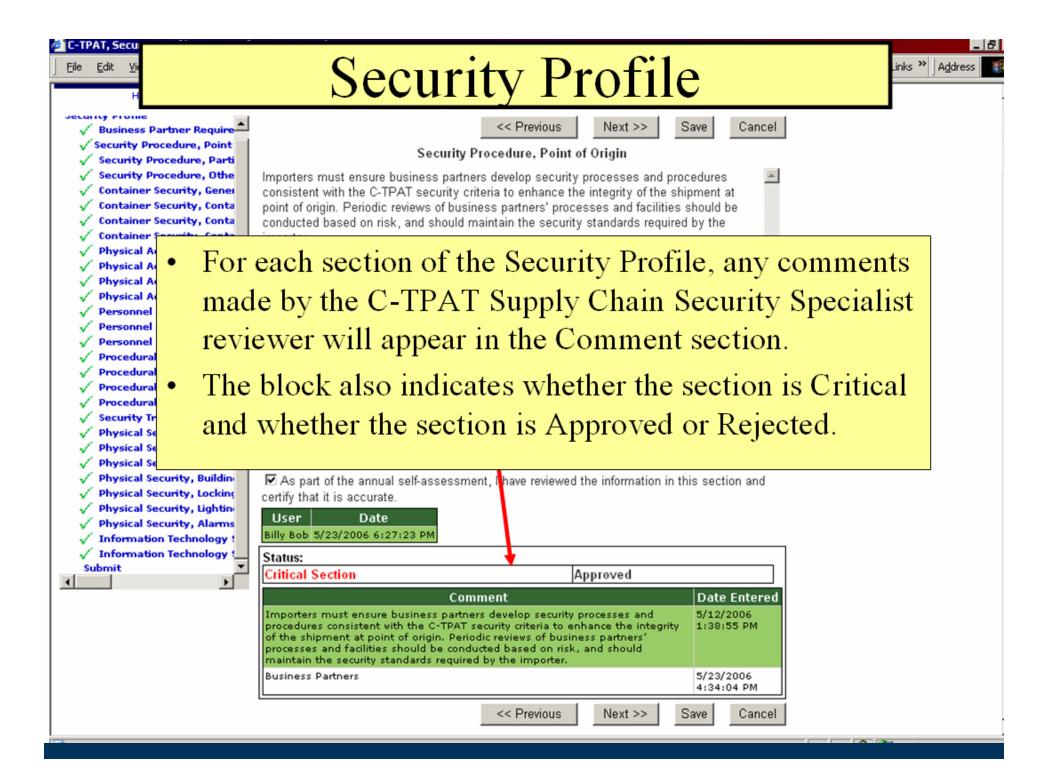

- Start with the minimum security criteria.
- Highlight each best practice.
- Include areas for improvement in the implementation plan.

Best Practices for Uploading to the Portal

- Upload each section in its most complete form.
- If you have figures add them as attachments, referencing the appropriate section of the portal.
- Attach one pdf of your complete profile.

Strategies for Domestic and Foreign Validations

- Have your entire C-TPAT team present for both foreign and domestic validations.
- Include senior management.
- Include a site map identifying all cameras and guards.
- Present both minimum security criteria and best practices.
